Unser Produkt

Das Sortiment an Prasco-Wischerblättern erfüllt die Anforderungen an Effizienz, Haltbarkeit und Kompatibilität mit einer Vielzahl von Fahrzeugen.

Das aerodynamische Design ermöglicht eine gleichmäßige Druckverteilung, verbessert den Kontakt mit der Windschutzscheibe und optimiert die Entfernung von Wasser und Verunreinigungen.

Hauptmerkmale

Das aerodynamische Profil reduziert Turbulenzen und garantiert eine gleichmäßige Haftung auf der Glasoberfläche. Durch die Kappe am Ende des Produkts kann die richtige Krümmung und Spannung beibehalten werden.

Die 12 Adapter ermöglichen die Installation bei fast 98 % der europäischen Flotte.

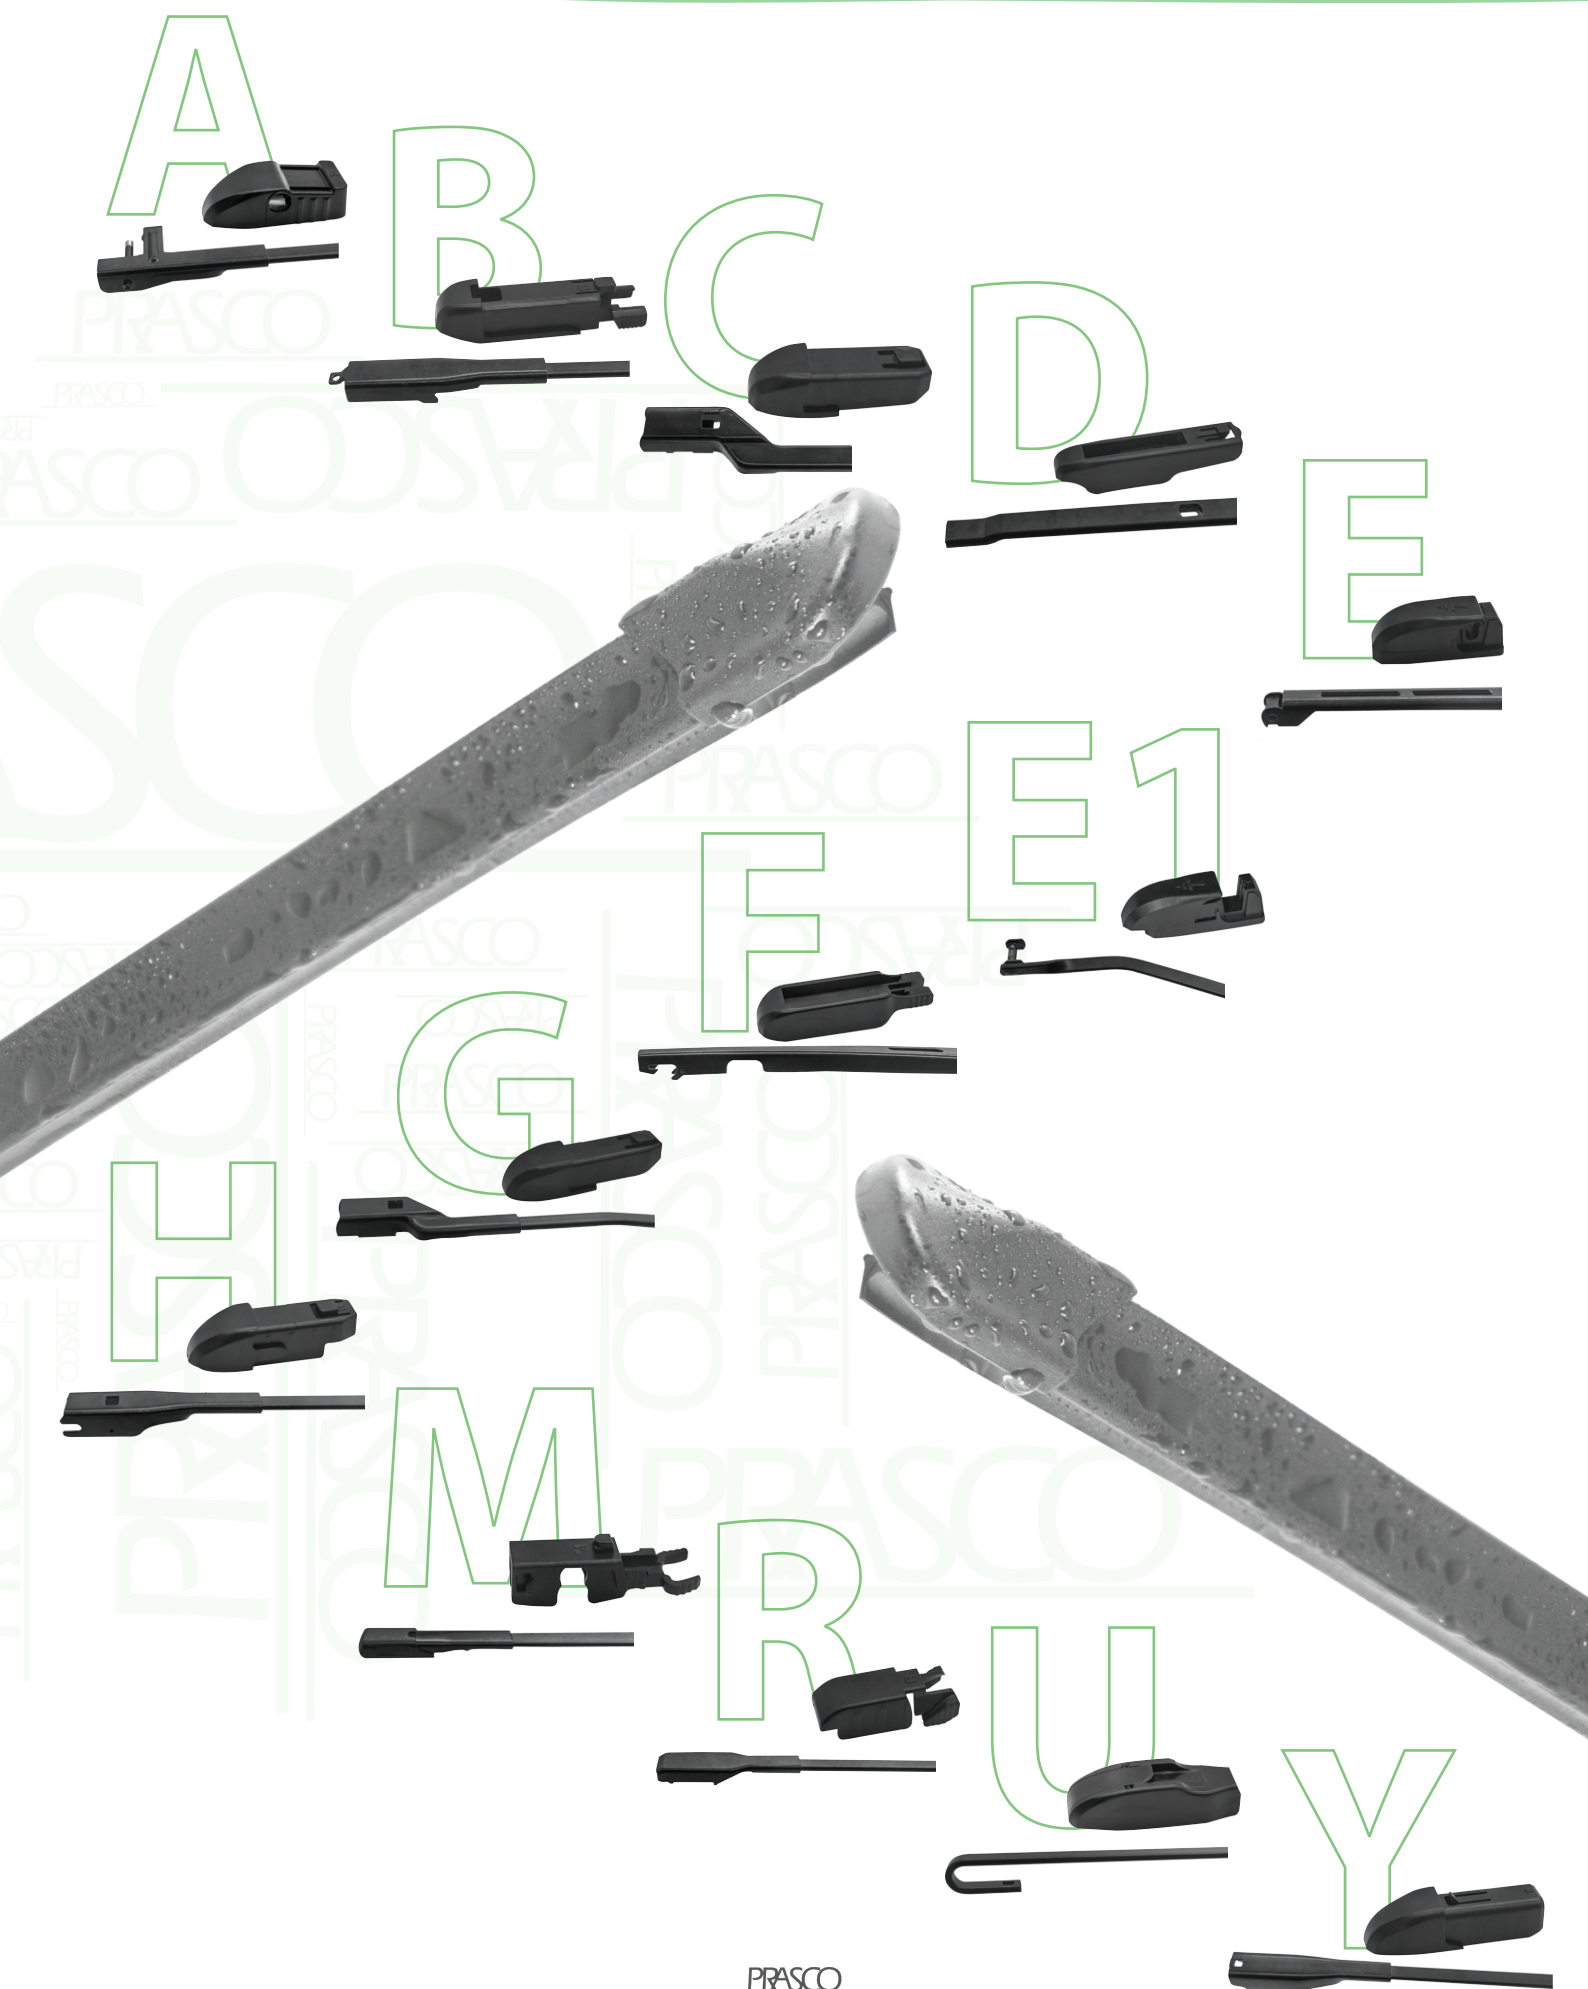

Die Materialien sind so konzipiert, dass sie ihre Wirksamkeit über einen längeren Zeitraum beibehalten und wechselnden klimatischen Bedingungen standhalten. Der verwendete Gummi enthält außerdem Graphit und Teflon.

Die Struktur ist optimiert, um Vibrationen und Lärm zu reduzieren.

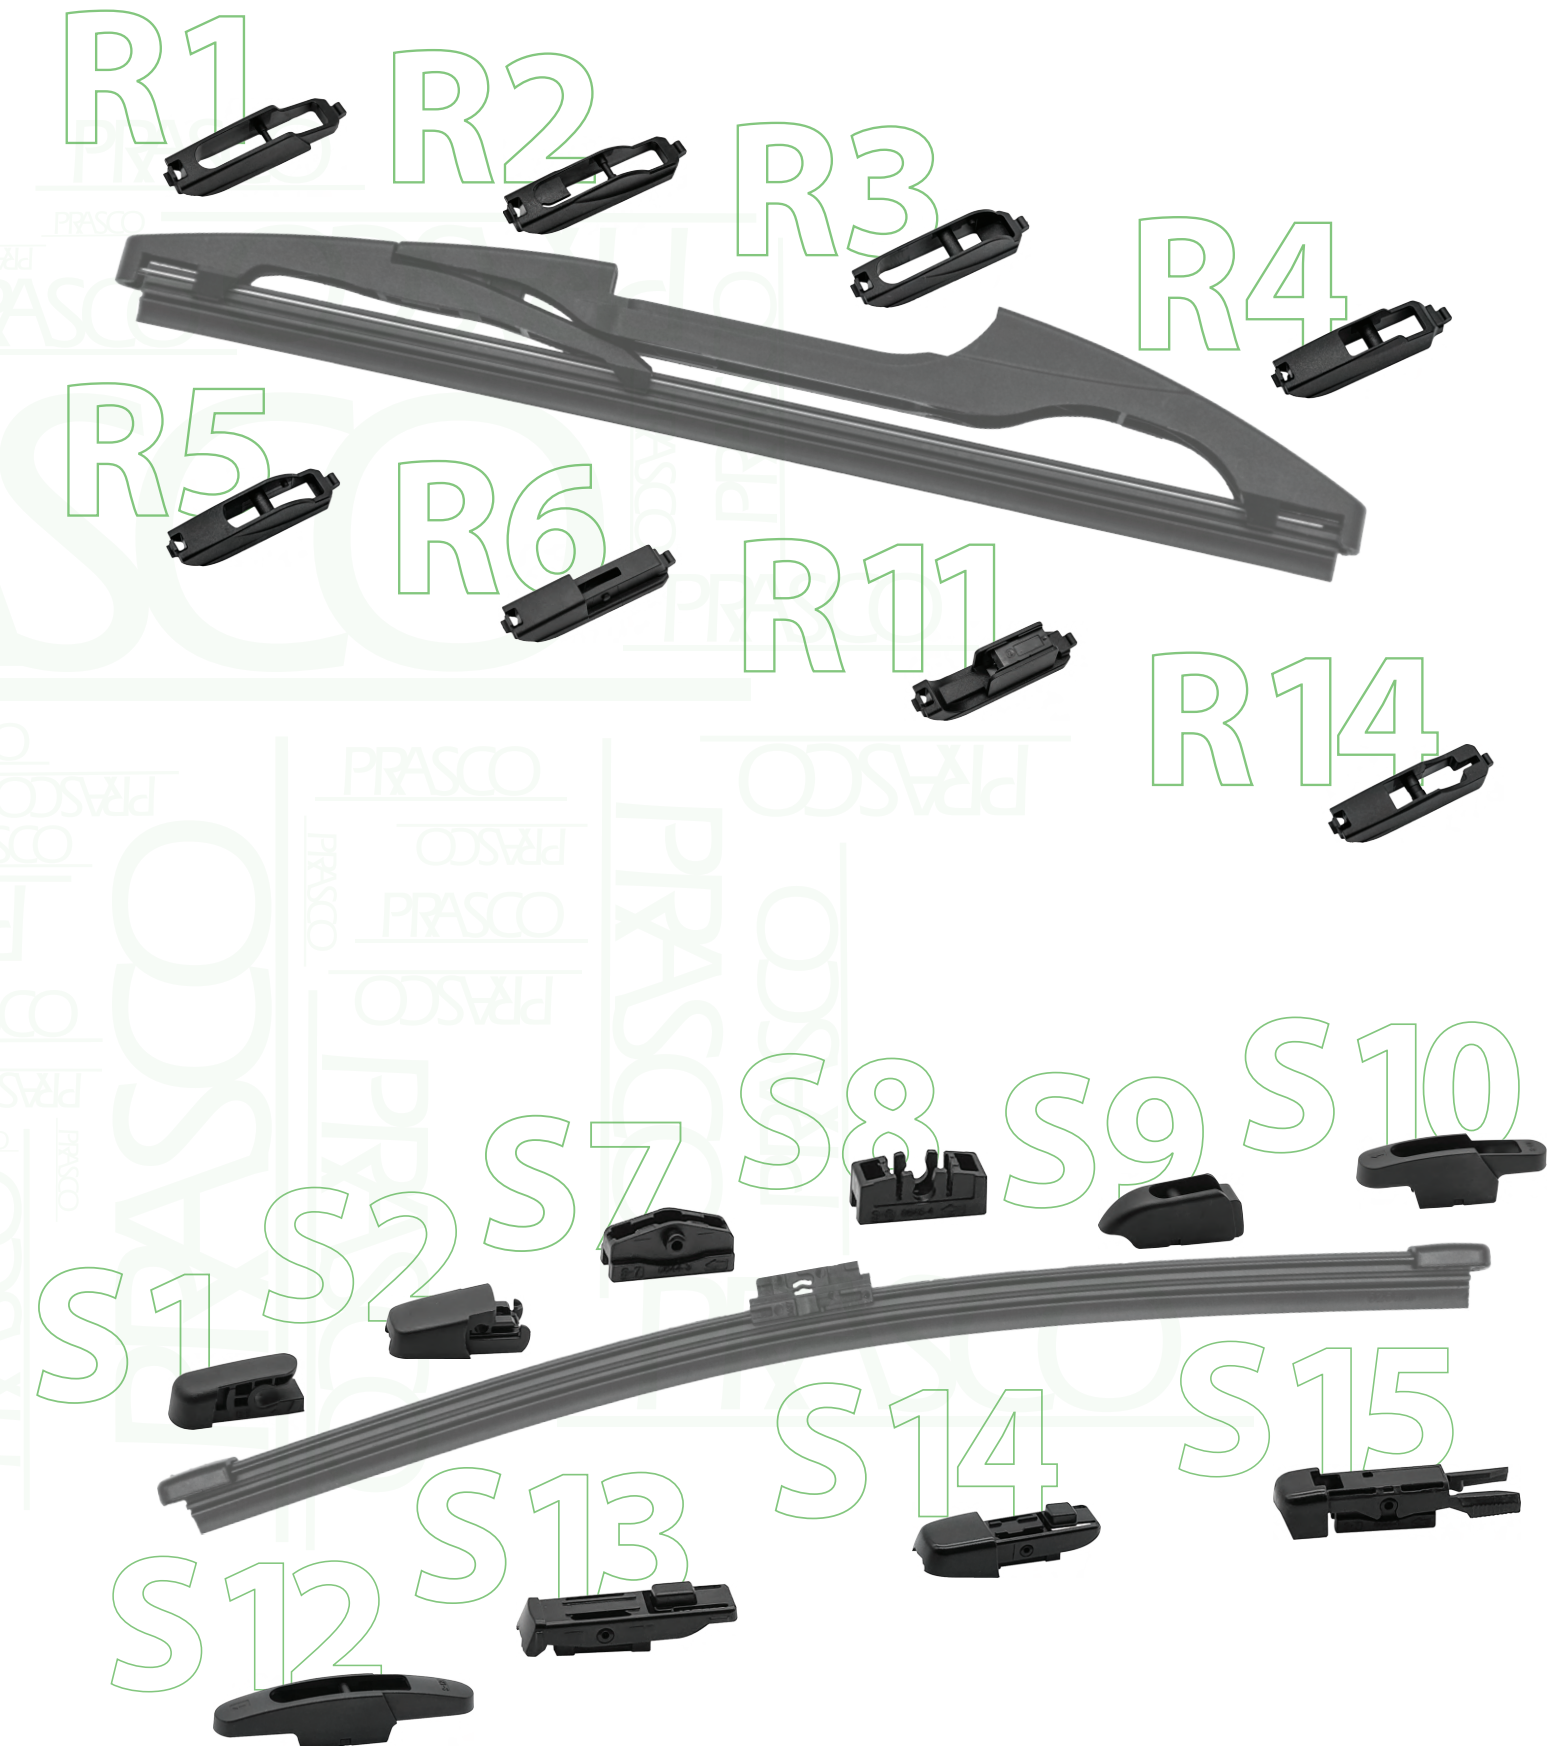

Die Montage ist einfach und intuitiv: der Austausch kann schnell und ohne jedes Werkzeug durchgeführt werden.

Prasco-Wischerblättern sind so konzipiert, dass sie im Laufe der Zeit eine anpassungsfähige Leistung gewährleisten und so zur Verbesserung der Sicht und Sicherheit beim Fahren beitragen. Sie wurden bei unterschiedlichen Wetterbedingungen getestet und bewahren die Flexibilität bei niedrigen Temperaturen und die strukturelle Stabilität bei Hitze und UV-Strahlung.
